ENSTROM TH-28/480 SERIES ILLUSTRATED PARTS CATALOG

SECTION 1 – TABLE OF CONTENTS

Cover	1-1
Table of Contents	1-1.2
Scope	1-2
Introductory Information	1-2
Detailed Parts List	1-3
Appendices	1-4

NOTE

Please read the following introductory material carefully and completely. Understanding how information is presented will allow you to make optimum use of this catalog,

SCOPE

The Illustrated Parts Catalog (IPC) provides by means of text and companion illustrations, complete definition of all repair parts and spares items available to the customer. The IPC contains information on TH-28/480 series helicopters manufactured by The Enstrom Helicopter Corporation, Menominee, Michigan. It is furnished for the purpose of parts procurement ONLY and shall not be used for any other purpose.

Orders for repair parts for engine or accessories (generators, fuel controls, etc.) used in Enstrom helicopters should be placed with the engine or accessory manufacturer's authorized distributor or dealer and not through The Enstrom Helicopter Corporation.

INTRODUCTORY INFORMATION

The introductory portion of the IPC contains Record of Revisions, Change Methods, Title Page, Recommended Change Report, Table of Contents, Effective Page List and Part Number Index.

RECORD OF REVISIONS

A Record of Revisions page is placed in front of the manual to record the insertion of revisions as they are issued for the publication.

CHANGE METHODS

The IPC is periodically brought up-to-date by one of two methods.

Normal revisions are issued in the form of replacement pages and added pages to be inserted at designated locations. Revision instructions are included on the Revision Cover page, and once the revisions are inserted in the manual, the Record of Revisions page should be updated and the Revision Cover page be placed behind the Record of Revisions page.

Temporary revisions are issued in advance of the normal revision. In most cases, for example, the purpose of a temporary revision is to expedite the release of safety critical changes to the field. A temporary revision page is identified by a unique index number, i.e. Rev. 13, TRT-001 (Revision 13, Temporary Revision (Turbine) 001). This unique index number is found in the revision level field of the page footer (left side). Temporary revision pages shall be printed on yellow stock. Instructions are contained on the temporary revision page, and once the temporary revision pages are inserted in the manual, the Record of Temporary Revisions page should be updated. Temporary revisions shall be maintained in the IPC until such time they are incorporated into the next normal revision issue.

ENSTROM TH-28/480 SERIES ILLUSTRATED PARTS CATALOG

TITLE PAGE

The Title Page lists the date of the currently effective edition or reissue. Information is given noting whether the contents are the initial issue of a publication or a reissue of the entire publication.

RECOMMENDED CHANGE REPORT

The Recommended Change Report is a form that can be used to notify Enstrom Helicopter Corporation of any errors or other changes requested by the user.

TABLE OF CONTENTS

The Table of Contents lists all material contained in the catalog by Section Number, Figure Number, Title and Page Number.

EFFECTIVE PAGE LIST

The Effective Pages List contains all of the pages that are currently effective for the publication, and their effective date.

PART NUMBER INDEX

The Part Number Index provides a listing of all of the part numbers in the catalog, with their corresponding Figure and Item numbers.

DETAILED PARTS LIST

The Detailed Parts Lists begin at Section 3 and contain all replacement parts starting with the helicopter major assemblies and proceeding through the various installations, subassemblies, detail and component parts breakdowns.

CHANGE BARS

Change bars are located throughout the IPC to identify information that has been changed. The Revision Number and Date of those changes is located at the bottom of each page.

ILLUSTRATIONS

Each major assembly or component is separately illustrated. Each part or assembly portrayed in the illustration is assigned an Item Number for cross reference to the parts list bearing the same figure number as the illustration.

ITEM NUMBER COLUMN

This column shows the Item Numbers assigned to each part in the list. This number links the part to the detail parts on the associated illustration.

- A dash (–) printed in this column indicates the part is not illustrated.
- Symbols printed in this column refer to footnotes at the end of the parts list.

PART NUMBER COLUMN

Part numbers in this column are used to identify parts for ordering. In most cases the number shown is the manufacturer's part number.

DESCRIPTION COLUMN

This column lists the nomenclature and description of parts, reference to next higher assemblies, and reference to other locations for breakdown of separately illustrated assemblies or components.

Indentation System

A period/dot system is used to show the relationship between major assemblies/components and the respective detailed parts. The nomenclature of major assemblies and/or components is preceded by a single period/dot. Parts preceded by two periods/dots are detailed parts of the preceding part with one period/dot. All parts preceded by three periods/dots are detailed parts of the preceding part with two periods/dots, and so on.

QTY PER ASSY COLUMN

This column lists the total number of units required at that location

- The abbreviation A/R may be located in this column indicating that the part is to be used as required during installation. Examples are shims, safety wire, and adhesives.
- The abbreviation REF may be located in this column indicating that the part listed is for reference only and is not shown in the illustration.

EFFECTIVITY COLUMN

This columns identifies if the parts are applicable to the TH-28, 480, and/or 480B model helicopters. Notes located at the illustrations or after the detailed parts lists may also contain applicability information.

APPENDICES

The Appendices at the rear of the IPC contain additional information about equivalent parts and hardware substitutions.

GENERAL

All owner parts orders should be placed through your nearest Enstrom Helicopter Dealer or Service Center. If you are unable to locate your Dealer or Service Center, contact the Enstrom Customer Service Manager for this information.

PARTS ORDERS

All parts orders should be addressed to:

Parts Coordinator

Enstrom Helicopter Corporation
2209 22nd Street
Menominee, MI 49858-3595

Telephone: (906) 863-1200
Fax: (906) 863-6821

Email: customerservice@enstromhelicopter.com

Please complete the parts order form located on the Enstrom.com website at: http://enstromhelicopter.com/wp-content/uploads/2012/03/PARTS-ORDER-FORM-V4.pdf
If you do not have access to the form, please include the information outlined in the following paragraphs.

To ensure shipment of the proper parts, be sure to include the model number and the serial number on each aircraft order. This information can be found in the Aircraft Log book and on the data plate attached to the right rear side of the tailcone.

Order by part number and description as shown in the IPC list. Be sure to list the quantity required. Incorrect numbers will be returned for clarification and delay shipment of your order.

The purchase order must indicate the name and address of the ordering organization, and the name and address of the organization to whom the parts are to be shipped. It must be signed by an authorized representative of the dealer or service center.

If parts are ordered by telephone, the purchase order must have the words "confirming order" and the confirming date on the purchase order to avoid duplication of shipments.

All returned orders will be assessed a 20% restocking charge.

NOTE

The Enstrom Helicopter Corporation reserves the right, without prior notice, to supply substitute interchangeable parts for the ordered part when design changes, revised specifications, stock supply, or product improvements make such a substitution necessary.

SHIPMENT

All purchase orders must specify the desired method of shipment. If this information is not stated, the shipment will be made via surface transportation. The specific carrier will be determined at the time of shipment based on weight, dimensions, and destination. Shipment by other than surface transportation must be indicated at the time the order is placed and must be shown on the purchase order.

All truck and air freight charges are on a collect on delivery (C.O.D) basis.

EMERGENCY REQUIREMENTS

Telephone orders for emergency (**AOG**) situations receive priority processing, and should be kept to a minimum; since they delay shipment of normal orders.

CREDIT TERMS

Enstrom does not automatically establish credit terms. All orders for domestic shipment are sent C.O.D. unless prior arrangements have been made. Payment arrangements for export order shipments may be accomplished by establishment of an irrevocable letter of credit for major shipments. All other shipments will be by sight draft.

Requests for an open account or other credit terms should include a copy of the latest financial report; three (3) credit references; one (1) banking reference; and the desired amount of credit. This information should be addressed to:

Controller
Enstrom Helicopter Corporation
2209 22nd Street
Menominee, MI 49858-3595

By closely following the above instructions, you will help the Enstrom Helicopter Corporation provide faster delivery and better service.

* Early production TH-28s and 480s had a two-piece step/oil cooler exit access panel. Contact Enstrom Customer Service for part number information.

** Part of the Increased Cooling Kit, P/N 4230031, which increases the ambient temperature operating limitations. Eligible for installation on 480B, S/N 5089 and subsequent.

†	These assemblies are installed on the 480B, S/N 5114 and subsequent, and are equipped with additional cooling holes. Assemblies with additional cooling holes are part of the Increased Cooling Kit, P/N 4230031, for 480B, S/N 5089 through 5113, and are eligible for installation on all TH-28, 480, and 480B aircraft.
‡	Installed on 480B, S/N 5114 and subsequent. Part of the Increased Cooling Kit, P/N 4230031, for 480B, S/N 5089 through 5113.
≡	See Appendix A for equivalent part information.
●	Effectivity 480B S/N 5148 and subsequent. Retrofittable to 480 S/N 5001 subsequent, and 480B S/N 5042 subsequent.
●●	Effectivity 480B S/N 5155 and subsequent. Eligibility 480 S/N 5001, 480B S/N 5042 and subsequent.
††	Effectivity 480B S/N 5161 and subsequent. Eligibility 480 S/N 5001, 480B S/N 5042 and subsequent.
‡‡	Effectivity 480B S/N 5164 and subsequent. Retrofittable to 480 S/N 5001 to 5041 and 480B S/N 5042 and subsequent.
♦	The 85-12-140-20 Wing Stud Fastener is an acceptable alternate to the 58-12-140-16 Wing Stud Fastener when unpainted.
♦♦	Replaces previous 4220150 Cowling Doors for the Increased Cooling Kit. Effectivity 480B S/N 5207 and subsequent. Retrofittable to 480 S/N 5001 and subsequent, and 480B S/N 5042 and subsequent.
Δ	CCR264SS-3-03 rivet with NAS1149FN316P is an acceptable alternate.
▼	5X #41 holes added on the forward edge.
∞	Optional non-vented cowl doors.

* Prior to 480B, S/N 5067, the windows were bonded to the cabin structure with adhesive. Replacement windows for these aircraft may be installed using either the adhesive installation or the foam tape and hardware installation.

** Rivet length as required (CR91484-4-03, -04, or -05; or AD43BSLF, AD44BSLF, or AD45BSLF, as applicable).

† Apply to exterior centerline void between 4114002-29 and 4114002-30 windshields and apply to interior centerline doubler edges.

● Use to trim out all windows.

†† MS20604AD4W( ) series rivets are non-truss head rivets and require washers under the head and tail.

* Hinge, P/N 28-11227-15, is a split hinge. The aft portion of the hinge half installed on drive shaft cover is installed on the drive shaft cover located aft of the hinge location.

** These nut plates secure the tail rotor drive shaft bearing housings.

† Hinge, P/N 28-11227-17, is one half of a split hinge installed on aft end of both 28-11239-1 and 28-11239-3. Hinge, P/N 28-11227-21, is the other half of the split hinge installed on forward end of 28-11239-3 and 28-11239-9. Hinge 28-11227-19 is the base hinge. This set up replaces the 28-11227-15 hinge.

Note 1 Use EC-776 fire resistant tank sealant to coat the interior of the fuel bladder structure and the backwall.

Note 2 Use PR1440B1/2QT fuel tank sealant to seal the backwall to the structure joints and to the beam, cowl ring, and cabin.

Note 3 Pot inserts with EA9394 structural epoxy adhesive per SP-141.

Note 4 Edge fill with TF3056FR potting compound.

▌ * Preferred part for TH-28 S/N 3007 and subsequent and 480B S/N 5043 and subsequent.

▌ ** Acceptable alternate for TH-28 S/N 3004 - 3006, all 480 models, and 480B S/N 5040 - 5042.

† Thickness as required to ensure a minimum 3.2 mm clearance between the upper plenum/air inlet and the drive belt. Foam tape 4508-1 is not used when the spacer is installed.

● Effectivity 480B S/N 5155 and subsequent. Retrofittable to 480 S/N 5001 and 480B S/N 5042 and subsequent.

†† Effective 480B S/N 5152 the 4119351-15 replaced both 4119351-11 hand holds. Effective 480B S/N 5155 the 4119351-17 replaced the 4119351-15 on the left side of the ship. All dash numbers are retrofittable to 480 S/N 5001 to 5041 and 480B S/N 5042 and subsequent.

∆	One (1) assembly installed on the left side for S/N equipped with air conditioner installation P/N 4220176.
◊	Refer to SDB T-060, latest revision, for nutplate installation requirement.
▲	Effectivity 480B S/N 5242 and subsequent; Eligibility 480/B S/N 5241 and prior (NAS1068-A3 originally installed).
††	Includes engine wash kit nozzle.
▼	Use AN525-10R8 to AN525-10R14 depending on fiberglass thickness.

† Number of washers varies with bolt length.

One (1) washer under the head when used with bolts AN5H-45A and AN5H-46A, three (3) under the nut.

Two (2) washers under the head when used with bolt AN5H-6A.

†† Use one (1) washer under the head.

** For 480/480B S/N 5139 and prior, the quantity is eighteen (18).

For 480/480B S/N 5140 and subsequent, the quantity is six (6).

* Early production TH-28 and 480 aircraft have a pulley located approximately midpoint on the outboard side of the keel beams. These aircraft have a total of twelve (12) pulleys.

** Install the cover when the co-pilot pedals are removed.

≡ See Appendix A for equivalent part information.

† Used with 4168001-9 Tail Rotor System Installation.

‡ Effectivity 480B S/N 5185 and prior.

● Not installed with 4168001-5 installation.

♦ Quantities halved for 4168001-5 installation.

∞ Add 2 rivets for 4168001-1 installation.

▼ Co-pilot side only if washers, Item 64, interfere with keel flange radius.

1. Introduction

This Appendix lists various equivalent part numbers which have been used to identify parts. The parts listed below have not changed, although they may have been supplied under any of the alternate part numbers listed. The changes may have resulted from a supplier change, a procedural change, or simply a correction of a typographical error. Any of the equivalent part numbers may be installed in place of the corresponding primary part number listed.

Enstrom Helicopter ECD-series parts (not listed) may have part numbers in the format ECDXXXX-YY, ECD-XXXX-YY, or ECD XXXX-YY. All three of these part number formats may be used interchangeably. Parts with the same numbers are identical, regardless of the number format

For example:

PART NUMBER	EQUIVALENT PART NUMBERS	DESCRIPTION
ECD4055-11	ECD-4055-11 ECD 4055-11	Illuminated Panel

When ordering new parts, please use the “PART NUMBER” column for faster service.

1. Introduction

This specification establishes the conditions under which hardware may be substituted and lists the specific hardware which may be substituted. These standard substitutions apply only to components and assemblies which are designed by Enstrom and assembled in house. The tables which follow list the substitutions which are permissible. The hardware called out on the drawing is the preferred configuration. Each table contains a left-hand column which lists the basic or preferred hardware. The adjacent column to the right lists the alternate hardware. Alternate hardware may be used as a substitute for the hardware in the left column; however, hardware in the left column may NOT be substituted for hardware listed as alternate. In cases where hardware is interchangeable, 'Equivalent Substitution' will be stated in the right-hand column. In the case where there is no substitution, N/A (no alternate) will be stated in the right hand column.

2. Acceptable Substitution Conditions

Hardware may be substituted without further approval when all the following conditions apply:

- The preferred hardware is unavailable.
- There is an acceptable alternate listed in this report.
- All the other material conditions (hole diameter, material thickness, etc.) are within standard tolerances for the component.

To correct for component stack-up to ensure the nut is not screwed down against the last thread on the bolt and one to three threads showing past the nut, the grip length of the fastener may be substituted without further approval by the following methods:

- The length of rivets, screws, bolts, or quarter (1/4) turn fasteners may be increased or decreased one grip length (a "dash number").
- Washers may be added or subtracted or washer thicknesses may be substituted. Up to a total of three washers may be installed in combination under the head of the bolt and/or nut. (Washer substitutions must be in accordance with standard aircraft practices.)
    - Consult Engineering if it is necessary to remove all the washers or if there is a conflict with the washer requirements on the approved drawing.
- Consult Engineering if a specific hardware installation consistently requires adjustment in accordance with the conditions of this paragraph.

Substitutions may NOT be made in fastener diameter without engineering approval. Substitutions may NOT be made beyond one grip length or "dash number" without engineering approval.

3. Hardware Tables

Tables for substitute hardware are provided on the following pages. If the substitution is applicable to all dash numbers of a particular part number, it will be represented by a set of open parentheses. For example, AN3-( ) would indicate that the substitution includes all dash numbers for the AN3 bolt.
