SERVICE INFORMATION LETTER

SERVICE INFORMATION LETTER NO. 0072

Date: May 1, 1978
Subject: Eligibility for Certification in Republic of West Germany
Model: F-28C and 280C
Effectivity: All Serial Numbers

The Enstrom F-28C and 280C Model helicopters are eligible for approval in the Republic of West Germany providing some changes to the basic type design are made. The purpose of this Service Letter is to document those changes.

The following must be accomplished:

1. The helicopter must be equipped with approved anti-collision lights.
2. The altimeter must have the barometric scale marked in millibars.
3. The placards must be in the German language.
4. An LBA-approved Rotorcraft Flight Manual in the German language must be furnished with the helicopter.

We also recommend that leading edge tape be installed on the main rotor blades of helicopters delivered to West Germany.

Avionics and fire extinguisher, if installed, must be of type approved in West Germany.
